Chapter 1

Introduction

This report contains data collected in your school(s) using the **Prevention-FIRST!** Survey developed in conjunction with **Pride Surveys**. Your reports are organized as follows:

1. A Summary that provides you with the fundamental findings in an abbreviated and easy to read fashion.
2. Color Graphs that provide more expansive results from the survey in pictorial fashion.
3. A List of Tables which contains the complete findings of the survey. This section itemizes student responses by each grade level and each item scale (for example: never, seldom, sometimes, often and a lot).
4. A Narrative Report which includes both text and graphic images. This section also includes a sample news release.

Additionally, the report contains a special section entitled *Drug Free Communities Support Program*. This section was developed to provide the data needed to satisfy core measures required by the Drug Free Communities Support Program, administered by the Substance Abuse and Mental Health Services Administration. **NOTE:** Federal requirements have changed in regard to what questions should be used for reporting purposes. In particular, Past 30 Day Use is now calculated using a different question than has been used in the past. All references to past 30 day use will be based on the new questions.

It should also be noted that perception of harm and perception of risk measures similar constructs. Both of these sets of questions have been included in this survey to make it possible to compare to past data.

This year, Pride Surveys in consultation with PreventionFIRST! has made changes to the dubious and discrepancy checks (honesty checks) for the Cincinnati PreventionFIRST! survey. You will notice some significant changes in student data from previous years and should note that longitudinal data will not be reflective of actual changes in use over time. This change was made to improve the quality of the data and is a more accurate reflection of actual use since more dishonest surveys have been excluded from the data set than in previous years.

This year's data can be considered a new "baseline" moving forward and will improve the accuracy of the results overall for all participants and stakeholders. If you would like more information about what the checks are and how the dishonest threshold is calculated please email info@pridesurveys.com.

1.1 How To Use Your Data

- Meet the accountability requirements of federal and state agencies that your programs be evidence-based.
- Establish a needs assessment to design and secure funding for new programs.
- Conduct periodic performance evaluations for continuing programs.
- Encourage community-wide support for your programs.
- Determine why negative student behaviors occur by examining risk and protective factors.

We recommend that you share the findings of your survey with staff/faculty, administration, boards of education, elected officials, parents, community organizations and the news media.

While the findings are likely to show that certain problems exist within your student population, the overriding message will be that you are taking a fact-based approach to understand and solve these problems.

Chapter 2

Summary

Many federal agencies have identified certain data that are most important in measuring drug use and perceptions among youth. These data are often referred to as the *Core Measures* and consist of:

- **Reported 30-day Use** - the percentage of students who have reported use in the last 30 days,
- **Perception of Risk** - the percentage of students who reported that a drug was *harmful* or *very harmful*,
- **Perception of Parental Disapproval of Use** - the percentage of students who reported that their parents would feel it was *Wrong* or *Very Wrong* to use,
- **Perception of Friends' Disapproval of Use** - the percentage of students who reported that their friends would feel it was *Wrong* or *Very Wrong* to use,

For the drug categories of cigarettes/tobacco, alcohol, marijuana, and prescription drugs. The chapter entitled *Drug Free Communities Support Program Core Measures* will delve into these measures in detail. This section will briefly summarize these data.

2.1 Core Measures

Table 2.1: Core Measures for All Students

Measure	Cig/Tob	Alcohol	Marijuana	Presc. Drugs
Past 30 Day Use	3.7	11.2	6.5	2.1
Perceived Risk	88.9	78.6	69.8	86.9
Parental Disapproval	95.6	89.8	93.7	96.6
Friends Disapproval	83.1	69.6	77.3	90.0

2.2 Annual Use

This is the percentage of students who reported any use in the past year.

Table 2.2: Percentage of Students Who Report Using Drugs

Graphics

The following graphs will assist you in understanding the relationship of student behavior to alcohol and other drug usage. You are encouraged to make overheads or slides from the graphs for presentations to school faculty, parents, media, and other audiences in the community.

The *Location* and *Time* of drug use graphs will be helpful in understanding the need for a commitment to drug abuse prevention by parents and the larger community - not just by schools. Student alcohol and other drug use occurs most often outside the school and at times when school is not in session.

The *Perceived Harm* of alcohol and other drugs will assist with understanding how the false assumptions concerning harm are related to drug use. When drugs are perceived as harmless, the probability of use increases.

Research indicates that easy access, *Availability*, to drugs increases the probability of use. Availability of alcohol and other drugs normally increases at higher grade levels.

3.1 Frequency of Use

3.1.1 Annual Use

The following charts show how students responded to questions about use in the past year. The specific text of the question began with the header, "Within the past year how often have you..." and continued with various behaviors including substance use and abuse as well as factors relating to vehicle safety.

3.2 Perception of Harm

An adolescent's perception of the risks associated with substance use is an important determinant of whether he or she engages in substance use. For example, youths who perceive high risk of harm are less likely to use drugs than youths who perceive low risk of harm. *

Students are asked about their perception of harm of any use of various drugs with the possible responses being No Harm, Some Harm, Harmful or Very Harmful. Past analysis of national statistics indicates that as students' perception of harm increases, use of substances decreases. It is also typical for the perception of harm (Harmful or Very Harmful) to decrease as a child gets older. Your students' responses are detailed in the following pages.

3.3 Perception of Parental Disapproval

Similar to the Perception of Harm, we can see an impact on adolescents if their parents strongly disapprove of drugs and drug use. You can see the cross tabs in your own data in section 3.11

3.4 Perception of Friends Disapproval

Similar to other categories of disapproval friends have influence over one another's behaviors. You can see more about this in the cross tabs section 3.11. Typically, students perceive a decreasing amount of disapproval from their friends as they grow older. This is helpful in understanding peer pressure. The following pages detail your students' responses to their friends' disapproval.

3.5 Average Age of Onset of Use

The question "At what age did you first use..." is used to measure this statistic. The possible responses to this question range from 10 or Under, to 17 or Older, and Never Used. The table shows the average age of first use for those students who answered the question with a response other than Never Used.

3.11 Risk and Protective Factors – Cross Tabulations

This section looks at the following questions:

- Attend Church or Synagogue
- Take Part in Community Activities
- Make Good Grades
- Take Part in Sports Teams
- Take Part in School Activities
- Get Into Trouble at School
- Teachers Talk About Dangers of Drugs
- Parents Talk About Dangers of Drugs
- Parents Set Clear Rules
- Parents Punish for Breaking Rules

How students responded to each question is presented in table form. Students are then grouped based on how they responded to each question. The percent of illicit drug use for each subgroup is calculated and presented in graphic form. For example, if the bar for *Never* is at 40%, this means 40% of the students who marked *Never* reported using an illicit drug.

3.11.1 Attend Church or Synagogue

Students could respond to this question by marking Never, Seldom, Sometimes, Often or A Lot. The following table shows what percent of all students responded Never, what percent responded Sometimes, etc.

Table 3.1: Attend Church or Synagogue

RESPONSE	PCT
Never	24.8
Seldom	14.0
Sometimes	20.5
Often	15.5
A Lot	25.3

Students are grouped based on how they responded to the question and the percent of illicit drug use in the past year is calculated for each group. For example, if the bar for *Never* is at 40% this means 40% of the students who marked *Never* reported using an illicit drug.

3.12 Safety and Health – Cross Tabulations

The following graphs and tables summarize some of the *Student Information* questions regarding drug use. These data are calculated by examining specific subsets of your population. For example, a percentage is calculated for students who report carrying a gun and their liquor use. This percentage is calculated as follows:

$$\frac{\text{Number of those reporting carrying a gun to school and claiming to use liquor}}{\text{Number of those reporting carrying a gun and validly responding to the question *How Often Do You Use Liquor*}}$$

The *Ratio* describes the relationship between the groups examined on each graph. For example, in looking at Guns vs. No Guns if the cocaine ratio were 5.3, this would mean the percentage of students who report cocaine use was 5.3 times higher for students who report bringing a gun to school compared to those who don't.

3.13 Carrying a Gun to School

Total number of students surveyed = 5734

Total number who responded to this question = 5124

85 students reported carrying a gun to school. (1.7% of total responding)

Of the 85 students who reported carrying a gun to school,

31 report using liquor (39.2%),

18 report using marijuana (23.1%),

2 report using cocaine (2.5%),

1 report using Meth (1.3%).

NOTE: Results based on students who reported one or more instances of carrying a gun to school

3.16 Trouble with Police

Total number of students surveyed = 5734

Total number who responded to this question = 5563

722 students reported trouble with police. (13.0% of total responding)

Of the 722 students who reported trouble with police,

267 report using liquor (39.0%),

224 report using marijuana (32.5%),

26 report using cocaine (3.8%),

10 report using Meth (1.5%).

NOTE: Results based on students who reported any trouble with police

Drug	Police	No Police	Ratio
Liquor	39.0%	12.9%	3.0

Chapter 4

Percentage Tables

This chapter contains your school survey results in tabular form. Each table corresponds to an item on the questionnaire. The tables contain percentage data by grade level, grades 7 through 8 combined, grades 9 through 12 combined, and all grades combined. The *N of Valid* column contains the number of students who responded to the question and the *N of Missing* column contains the number of students who did not respond to the question. The remaining columns contain the percentages of students responding to the particular response categories.

The percentage tables of the report appear in the same order as corresponding questions on the questionnaire. The Table of Contents contains the percentage tables by section and gives the page number where each section is located. The List of Tables contains the location of each individual table.

Chapter 5

Drug-Free Communities Support Program Core Measures

The Drug-Free Communities Support Program, administered by the Center for Substance Abuse Prevention, requests specific data which is typically referred to as the Core Measures. The requirements for these data has recently been modified. The tables in this section reflect the latest changes and requirements. The drug categories measured are tobacco, alcohol, marijuana, and prescription drugs.

The first four tables are broken down by grade level and the following tables are broken down by gender.

30-Day Use The question *During the past 30 days...* is used to measure this statistic by reporting the percentage of students who report using in the past 30 days.

Perception of Risk The question *How much do you think people risk harming themselves physically or in other ways if they...* is used to measure this statistic by reporting the percentage of students who report that using the drug is *Moderate Risk* or *Great Risk* to their health.

Perception of Parental Disapproval The questions *How wrong do your parents feel it would be for you to ...?* are used to measure this statistic by reporting the percentage of students who report that parents would feel it is *Wrong* or *Very Wrong* to use tobacco, alcohol, marijuana, and prescription drugs.

Perception of Friends Disapproval The questions *How wrong do your friends feel it would be for you to ...?* are used to measure this statistic by reporting the percentage of students who report that friends would feel it is *Wrong* or *Very Wrong* to use tobacco, alcohol, marijuana, and prescription drugs.
