Duane Stansbury, R.S., M.P.H.
HEALTH COMMISSIONER

Scott R. Swope, D.O.
MEDICAL DIRECTOR

Isolation keeps someone who is infected with the virus away from others, even in their home.

Who needs to isolate?

People who have COVID-19

- People who have [symptoms of COVID-19](#) and are able to recover at home
- People who have no symptoms (are asymptomatic) but have tested positive for infection with SARS-CoV-2

Steps to take?

Stay home except to get medical care

- Monitor your symptoms. If you have an emergency warning sign (including trouble breathing), seek emergency medical care immediately
- Stay in a separate room from other household members, if possible
- Use a separate bathroom, if possible
- Avoid contact with other members of the household and pets
- Don't share personal household items, like cups, towels, and utensils
- Wear a mask when around other people, if you are able to

I think or know I had COVID-19, and I had symptoms?

You can be with others after

- At least 10 days since symptoms first appeared **and**
- At least 24 hours with no fever without fever-reducing medication **and**
- Other symptoms of COVID-19 are improving**Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation

I tested positive for COVID-19 but had no symptoms?

If you continue to have no symptoms, you can be with others after:

- 10 days have passed since the date you had your positive test
