

WARREN COUNTY HEALTH DISTRICT

416 S. East Street Lebanon, Ohio 45036

“Working to Build Healthy Communities Every Day”

2022 ANNUAL REPORT

Public Health
Prevent. Promote. Protect.

Vision: All members of our county are well and living in a healthy community

INTRODUCTION

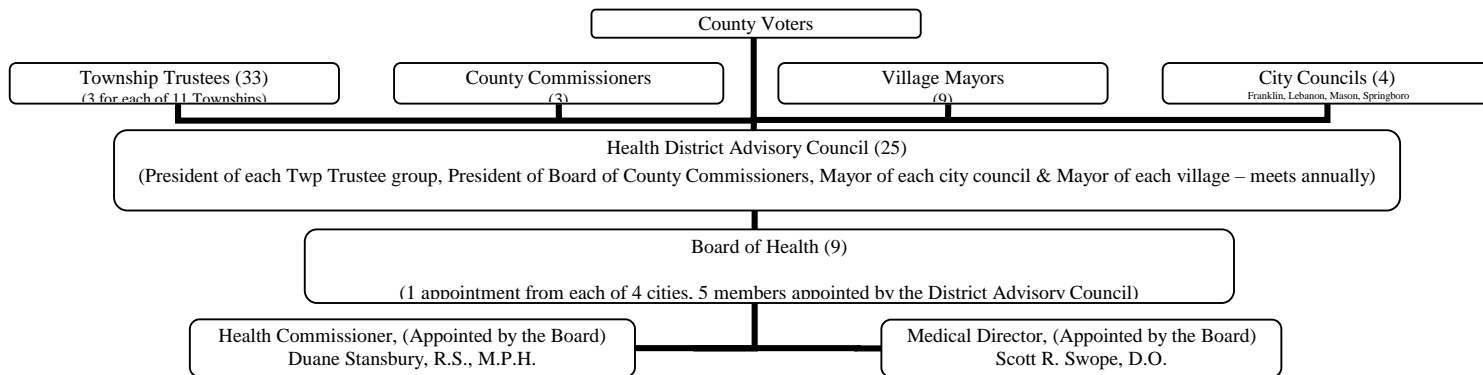

COVID-19 continued to be an issue in Warren County and across Ohio and the US in 2022. However, with vaccination efforts continuing during 2022 we saw the number of cases, as well as the observed level of severity of infection, decline over the year. While the vaccine was not highly effective at preventing cases, it was very effective at reducing symptoms and the seriousness of those who did come down with symptoms. The Warren County Health District (WCHD) employees have done a remarkable job responding to this outbreak. Also, a more effective bivalent vaccine was approved for use. This updated vaccine was more effective at preventing illness and reducing the severity of COVID-19 symptoms. At this time the Federal government has set May 11, 2023 as the date the public health emergency will end, unless significant changes occur.

The dedicated professionals that work at WCHD continue to provide all the services and programs we have provided Warren County for decades. Programs like primary care clinics, childhood immunizations, birth and death records, WIC, health education, food safety, public swimming pools, household sewage treatment systems, private water systems, plumbing, and other inspections, have continued to be done. We also are working to expand our regular child and adult health clinics that we offer to residents in Warren County.

Again, I want to say Thank You to all the employees of the Warren County Health District and our partners throughout the county. Your professionalism and dedication have helped keep Warren County one of the healthiest counties in Ohio.

Duane Stansbury, EHRS, MPH
Health Commissioner

ORGANIZATIONAL CHART OF THE WARREN COUNTY HEALTH DISTRICT

WARREN COUNTY BOARD OF HEALTH

The Board of Health is composed of nine members: four appointed by contracting cities with indefinite terms and five elected by the District Advisory Council to serve a five year term each.

2022 Board of Health Members:

City Council Appointees

Adam S. McClanahan.....Franklin Appt.
 Holly Boyd.....Lebanon Appt.
 J. Dick Staten, President.....Mason Appt.
 Nicole Ditmer.....Springboro Appt.

District Advisory Council Appointees

Terrie Zajo..... term expires 2023
 James Sosnowski, M.D..... term expires 2024
 Dominic Brigano..... term expires 2025
 Christine Jeffer, D.P.M..... term expires 2026
 Stephen A. Barr, PhD, Vice President. . term exp 2027

2022 DISTRICT ADVISORY COUNCIL

TRUSTEES

 City of Carlisle..... Randy Winkler
 City of Franklin..... Brent Centers
 City of Lebanon..... Mark Messer
 City of Mason..... Barbara Spaeth
 City of Springboro..... John Agenbroad
 City of South Lebanon..... James Smith
County Commissioner President..... Tom Grossman

NUTRITION

The dietitian for the Warren County Health District provided daily counseling to clinic patients from babies, child/teen, pregnant women, to older adults. One-on-one consultations involve healthy weight and disease management tips. Additionally, the WCHD dietitian offered nutrition education and healthy cooking events. Community work included providing a weekly nutrition education class for Warren County residents, nutrition and exercise education to local schoolchildren, while also providing healthy snacks and education at various wellness centers, and festivals throughout the county. The dietitian also assisted in managing the health and wellness program for the staff of WCHD with quarterly lunch and learn sessions, monthly challenges, and weekly exercise classes.

HEALTH EDUCATION

In 2022, the health educator worked with the WCHD nursing and environmental staff, community agencies, regional groups, schools and county residents to promote and improve the health, safety and wellness of citizens in Warren County. This included health fairs, school events, Vaping prevention education, add names of coalitions and working with the Cribs for Kids Program. The health educator also completed a Grief Recover Training method which will be implemented in the community in the coming year.

PUBLIC INFORMATION OFFICER (PIO) AND ACCREDITATION SPECIALIST

The PIO and Accreditation Specialist at Warren County focuses on many sources of external communication, such as WCHD's social media sites, newsletter, communication with area media, answering questions from citizens of Warren County, as well as attending state and regional PIO meetings and communication trainings. The PIO has also assisted in the coordination of distribution of at home COVID-19 tests to Warren County residents, assisted the Accreditation Coordinator in the Public Health Accreditation Board (PHAB) accreditation process and emergency preparedness by updating WCHD's emergency preparedness plan.

EMERGENCY PREPAREDNESS AND RESPONSE

For over 17 years, the Warren County Health District has prepared for public health emergencies through the Centers for Disease Control and Prevention's Public Health Emergency Preparedness Program. In its earliest iterations, the emergency planning focused on responses to anthrax attacks. Planning progressed and changed, moving to pandemic influenza, all-hazards preparedness, and special pathogens such as SARS and Ebola. Throughout 2022, WCHD continued to leverage the years of partnerships, planning, exercises, and staff development in response to the COVID-19 pandemic.

The Warren County Health District has had a successful COVID-19 vaccination campaign in 2022. In Warren County, 65% of the total population have had at least one dose of vaccine, 60% are fully vaccinated, 34% have had their first booster dose, and 15% have had their second booster dose at the end of 2022. As 2022 progressed, the volume of individuals coming to the clinic seeking COVID-19 vaccinations declined, which is representative of trends in neighboring counties and nationwide. Yet, the holiday season brought a temporary spike in volume for vaccine demand.

Thankfully, MPOX never became widespread in Warren County, and the few individuals exposed cooperated with quarantine guidelines. Throughout 2022, we were able to send those seeking the JYNNEOS vaccine to the City of Cincinnati Health Department to receive administration. Regarding emergency preparedness training, the Warren County Health District conducted an Anthrax Tabletop Exercise in November to test and evaluate response capabilities with various county partners.

Warren County Health District was awarded Accreditation by the Public Health Accreditation Board (PHAB) on March 17, 2020. Accreditation serves as a means to ensure our services and programs meet standards of public health performance. Throughout 2022 we have been tracking and documenting our services to submit to PHAB for our Annual Report due the end of March 2023 in order to maintain our Accredited status. Further, we have explored and began implementing numerous Quality Improvement and Performance Management projects which will improve the services we offer and the functionality of our operations. To highlight a few, two new software programs were introduced to the Plumbing department to streamline processes, research is being conducted on possibilities for a mobile clinic van, and bridges are being built to better serve our growing Asian Pacific Islander community.

PLUMBING INSPECTION SERVICE

The Plumbing Division of the Warren County Health District is responsible for ensuring proper installation of plumbing throughout all of Warren County in accordance with Chapter 4101:2-56-69 of the Ohio Administrative Code, also known as the Ohio Plumbing Code, and local regulations. The inspectors conduct inspections for bathroom and kitchen remodeling (when fixtures are added or moved), water heater replacement, water softeners, new single and multi-family residential, and all commercial plumbing installations. They also review plumbing plans for compliance with the Ohio Plumbing Code, and if approved, issue permits. This department also performs inspections of water line installations from the meter pit into the house or building within the City of Mason.

In 2022, 363 plumbing contractors registered with WCHD along with 583 installers to do plumbing work in the county. Also during 2022, 2,610 permits were issued, 6,171 inspections were conducted and 1,640 consultations took place to assist contractors and homeowners with plumbing code issues.

The Plumbing Division also administers an isolation water backflow prevention program. This involves making sure building owners have their required backflow prevention device tested annually (as required by the Ohio Plumbing Code) to assure it is working properly to protect the drinking water within a structure.

ENVIRONMENTAL HEALTH

The Environmental Health Division works to prevent disease, promote behaviors that improve the health of the community, and protect the environment through the enforcement of local and state rules and regulations, along with providing consultations regarding environmental health programs and activities. Our environmental health specialists conduct routine inspections of licensed establishments, investigate public health nuisance complaints, and provide education on environmental issues affecting Warren County. The programs conducted by health district staff include, but are not limited to, food safety, public swimming pools, campgrounds, manufactured home parks, housing, private water, residential sewage, tattoo/body art, school environmental health inspections, and vector control. Several of the programs conducted by the health district have no fees associated with them and are only made possible due to funds from the Warren County Health Levy.

The Environmental Health Division continues to utilize the environmental health inspection and licensing software known as HealthSpace that was provided to local health districts by the Ohio Department of Health (ODH) as well as the Health District Information System (HDIS). These programs allow for the electronic documentation of environmental health inspection reports on the HealthSpace servers as well as immediate accessibility of inspection reports online at www.warrenchd.com. HealthSpace modules have been developed for the food safety, public swimming pools/spas, body art, the rabies control program, and recreational campgrounds. The health district has worked with the new vendor, Accela, ODH has selected to manage environmental health programs throughout 2022. Accela will look to provide an improved interface for health district personnel, facility operators, and the general public in an effort to provide more information related to facilities citizens visit throughout Warren County. This program will display the same functions as HealthSpace, but will also incorporate programs that were never fully implemented through the HealthSpace platform.

The health district's vector control program continued to be bolstered in 2022 after receiving another round of supplemental funding through the Ohio Environmental Protection Agency's Mosquito Control Grant. Prior to the funding provided from the Mosquito Control Grant the health district focused on the testing of the local mosquito populations to check for the presence of West Nile virus and the application of larvicides to standing bodies of water on public property. This grant funding continues to allow the health district to host tire recycling events throughout the county. By recycling tires, one of the primary breeding sites for mosquitoes is removed from the community. During the 2022 grant cycle one tire recycling event was held in Harlan Township. The health district plans to hold additional events in the spring of 2023 and has applied for another round of funding to continue making strides with the vector control program. The health district will continue to only accept tires that are off the rim. Areas that wish to hold tire events in the future should contact 513-695-1220.

The Warren County Health District, through funding provided by the Ohio Environmental Protection Agency's Water Pollution Loan Control Fund, has the ability to assist property owners with failing household sewage treatments systems. The health district has been awarded \$150,000 dollars for the 2023 funding cycle. Funding is available based on household income and can cover between 50% and 100% of the cost of system repair or replacement. Funding can also be used to connect properties with failing sewage treatment systems to sanitary sewer in instances where sewer is readily available. Applicants must provide proof of income and ownership of property if they are interested in utilizing this funding. For more information, please contact 513-695-1220 and ask to speak to one of our sewage program staff members.

The Ohio Administrative Code requires that all households that are served by household sewage treatment systems will eventually have to be enrolled in the operation and maintenance program of the health district in which the property resides. The Warren County Health District currently has roughly 11,000 sewage treatment systems enrolled in the operation and maintenance program. Staff members are continuing to contact property owners about the operation and maintenance program and work to document the location of existing systems while also providing education to citizens about what can be done to adequately maintain their systems. A general rule of thumb is that sewage treatment systems should be pumped and cleaned around every three to five years depending on use. Household sewage treatment systems must be serviced by registered septage haulers or service providers. Please visit www.warrenchd.com for a list of the current registered contractors in Warren County.

For information concerning any of the environmental health programs such as copies of regulations, forms utilized in the various programs, or fact sheets visit our website at www.warrenchd.com.

COMMUNICABLE DISEASE REPORTING 2022

Communicable disease surveillance and investigation is a vital part of protecting the health and well-being of the citizens of Warren County. These surveillance and investigation activities are largely dependent on prompt disease reporting from many reporting sources. As required by law, healthcare providers (physicians, hospitals, infection preventionists), laboratorians and any individual having knowledge of a case or suspect case must report certain communicable diseases to the health district. Communicable disease reports received by the Warren County Health District are investigated and documented according to state guidelines. All reports received are kept confidential according to HIPAA requirements. Suspected, Probable, and Confirmed cases are included in the table below.

Amebiasis	2	Legionellosis.....	9
Anaplasmosis-Anaplasma phagocytophilum	2	Lyme Disease.....	18
Campylobacteriosis	33	Meningitis – aseptic/viral.....	10
Chlamydiainfection.....	444	Meningitis – bacterial (Not N. meningitidis)	6

CLINICAL SERVICES

Warren County Health District's clinical services continue to change and expand along with the growing changes in our community. In addition to the below clinics/programs, the Warren County Health District offers nutritional counseling, breast feeding consultations, social services, and blood pressure checks to all clinic clients and residents of Warren County. Free weight management classes for all ages are held Monday's, 4:00-6:00 pm. The health district also provides Spanish interpretation services for clients, if necessary, as well as the use of a language service for most languages. Also available is an Insurance Navigator for education and assistance with applying for Marketplace Insurance, as well as Medicaid. The **Prenatal Clinic** offers total obstetrical care for clients with delivery at Bethesda North Hospital of TriHealth. The staff consists of OB/GYN physicians (from Bethesda North), registered nurses, a licensed dietitian, case worker, and a secretary. Early and consistent prenatal care is encouraged to help ensure the health and wellbeing of both mother and baby. The prenatal staff screens each client for specific social and economic concerns, as well as counseling on daily health, nutrition, and smoking cessation. A lactation consultant is available to assist clients with breastfeeding education. Caseworkers assist clients in applying for Medicaid, health education, behavioral health screen and referral.

The **Family Health Clinic** consists of the Adult Health and Child Health clinics. Family Health Clinic exists to ensure affordable, culturally-appropriate, high-quality health and wellness services. A staff of physicians, nurse practitioners, nurses, a Spanish interpreter, an Uzbek interpreter, a dietician, and case workers provide quality care to infants and children birth to 21 years of age living in Warren County and surrounding counties and adults age 21 years of age and over living in Warren County. Services provided for infants, children and adults include acute care visits, maintenance visits (hypertension, diabetes and other chronic diseases), physical exams (routine physicals, well child checkups, sports physicals, work physicals, pre-operative and Head Start physicals), immunizations, hemoglobin testing, urinalysis, Tuberculosis skin testing, developmental screening, lead testing and counselling, referrals to appropriate agencies (if ordered by the provider), Prevent Blindness program for assistance receiving free eye exams and eye glasses, car seat program and medication assistance program. The Family Health clinic provides health care and referral services to uninsured clients, and clients with Medicaid. Most insurances are accepted. Medicare insurance is not accepted. The case worker helps clients for Medicaid or Marketplace insurance as needed.

The **Prevent Blindness Clinic** provides free vision exams at local Optometrists for low-income residents. The exams are provided through state funding.

The Overseas **Travel Clinic** provides immunizations and education necessary to travel safely to/from other countries.

The **Reproductive Health & Wellness Clinic** provides complete gynecologic physical exams for both clients desiring contraception and women's health needs. This clinic provides reliable methods of contraception to enable women to plan their pregnancies and provides pregnancy testing. Reproductive Health services are also provided to males in this clinic. The staff consists of a physician, registered nurses, a secretary, a caseworker, a Spanish interpreter, an Uzbek interpreter, and a licensed dietitian. The clinic coordinator has implemented preconception education and counseling programs for prepubescent and pubescent children for many schools and other public organizations. This clinic is a provider for the Ohio Department of Health Breast and Cervical Cancer Screening Project (BCCP). Also available in this clinic is Sexually Transmitted Disease services. Confidential STD testing and treatment is offered to men and women, as well as HIV/AIDS testing and education.

The main goal of the **TB Chest Clinic** is to eradicate tuberculosis in Warren County through early diagnosis and treatment. Mantoux skin testing, Quantiferon TB Gold blood test and chest x-rays, when required, are available at a minimal charge to Warren County residents. Treatment for tuberculosis and preventive therapy are also offered by WCHD. In the event of an active case of TB in Warren County, WCHD staff provides Direct Observed Therapy (DOT).

The **CMH (Children with Medical Handicaps)** program of WCHD provides case management and service coordination for Warren County families with children under the age of 21 years who have or potentially have special health care needs. The health district has one CMH nurse.

The **"Cribs for Kids"** program provides a free crib to parents or guardians who are in need for a crib and qualify for this program.

The **"Car Seat"** program provides a car seat to clients who do not have a car seat and complete the required education.

WIC PROGRAM

WIC – The Special Supplemental Nutrition Program for Women, Infants and Children is intended to reach income-eligible pregnant, postpartum and breastfeeding women, infants and children up to five years of age with a health or nutrition risk. WIC services are set up to address WIC’s most important goal: prevention of nutrition-related health problems. WIC provides: 1) Nutrition education and supplemental foods supplying key nutrients; 2) Health screenings and assessments; 3) Breastfeeding education and support; and 4) Referral to prenatal and pediatric health care and other maternal and child health care and human service programs. All of these services help to improve overall health during the most critical growth and developmental years in a child’s life – conception to age five. By preventing health problems early in life, WIC helps save health care dollars later.

The WIC program celebrated its 48th birthday on January 15th, 2022. Warren County has been on the retail system for twenty three years now with 17 vendors. Local WIC projects continue to issue the newer food packages that began in October 2009. The newer food packages added fruits, vegetables, whole grains and lower fat milk for adults and children two years of age and older. Recently, The United States Department of Agriculture has reviewed the food packages, to include cheese and yogurt. The current WIC food packages for women and children consist of milk, juice, cereal, peanut butter, dried or canned beans, whole grains, fruits and vegetables. And, the WIC food packages for applicable infants consist of infant formula, infant cereal and baby food fruits and vegetables. WIC participants continue to use a WIC Electronic Benefits Transfer (EBT) nutrition card. The WIC EBT nutrition card is loaded with their food packages and is able to be scanned at any Ohio WIC vendor. In addition, our Breastfeeding Peer Helper Program (initiated in October 2010) continues to offer breastfeeding support and education. To help the program, reach more people in the community, we continue to utilize our WIC breastfeeding Facebook page that we started in 2016 -- www.facebook.com/WICpeerhelper.

IMMUNIZATION PROGRAM

The immunization program continues to be an important focus of the Warren County Health District. Timely immunization of our children can help lead to the decline of communicable illnesses such as measles, mumps, rubella, diphtheria, polio, tetanus, pertussis, haemophilus influenza, hepatitis B, hepatitis A, meningitis, rotavirus, etc. Every year the health department experiences many changes that occur within the immunization schedules. New immunizations and new combinations of immunizations are added, while other immunizations are deleted. To meet the immunization needs of the county, we offer appointments for childhood and adult immunizations throughout the week, Monday through Friday.

In addition to the many flu vaccination clinics provided at the Warren County Health District, the nursing staff traveled to various Warren County businesses to provide flu vaccinations to as many residents as possible. This year, the health department began giving the flu vaccinations in September.

The Overseas Travel Immunization Program was added in 1999. This program has grown tremendously and continues to provide immunizations to Warren County residents who are traveling out of the United States. This service is also available to people who are not residents of Warren County, at an added cost. Warren County Health District also offers public health vaccines such as hepatitis A/B, pre-exposure and post rabies, pneumococcal, meningococcal, varicella, shingles, and Covid vaccinations.

Immunizations	No. Given

TB Blood Tests (Quantiferon)	26
TB Chest X-rays	40

HOME HEALTH NURSING/AIDE CARE

The Warren County Health District’s home health staff is dedicated to serving homebound clients in Warren County. This staff consists of a home health aide (HHA) and an R.N. that makes HHA supervisory visits to the client’s home. The purpose of this care is to enable the patient to remain in their home while enjoying the highest possible level of health.

The home health aide component of the Home Health Program continues to provide personal care assistance for the homebound client. This service is beneficial to the residents because it allows the client to remain in their own home and maintain independent living versus moving from their home and staying in dependent living quarters.

Home bound residents are also provided yearly seasonal flu vaccinations, in their home, by health district nurses.

WARREN COUNTY HEALTH DISTRICT

“Working to Build Healthy Communities Every Day”

Public Health

Prevent. Promote. Protect.

Warren County Health District is an Equal Opportunity Provider
of services and employment as required by the
Civil Rights Act of 1964
